Kottayam

2026

AUGUST e-M.Tech.

INDIAN INSTITUTE OF
INFORMATION TECHNOLOGY
KOTTAYAM

APPLY ONLINE

16 March 2026 Onwards

 emtech.iiitkottayam.ac.in

Overview

In the year 2025, the Indian Institute of Information Technology Kottayam launched the e-M.Tech. programme, a flexible, **self-paced** postgraduate programme comprising 60 credits, to be completed over a duration of 2 to 4 years.

Intended Audience

The programme is strategically designed for:

- **Fresh Undergraduates:** Students looking to transition directly into a specialized postgraduate degree programme to gain a competitive edge in the job market.
- **Working Professionals:** Industry practitioners seeking to upgrade their expertise and technical mastery while continuing their current employment.
- **Tech-Career aspirants:** Professionals aiming to switch their career path into cutting-edge fields like AI, Data Science, Cyber Security or Digital forensics.
- **Research Aspirants:** Individuals aiming for an Integrated PhD or high-level academic research positions.

Key Highlights

- **Specialized Degree Streams:** IIIT Kottayam offers two industry-aligned specializations under the e-M.Tech. programme:
 - Artificial Intelligence, Machine Learning, and Data Science
 - Cyber Security and Digital Forensics
- **Applied Learning & Infrastructure:**
 - Benefit from a rich learning ecosystem including Case Studies, Simulations, Virtual Labs, and Remote Labs to solve real-world technical challenges and access to the e-Library, offering a vast collection of digital journals, technical papers, and global research databases
 - Students are encouraged and mentored to produce high-impact journal or conference publications during the programme.
 - The thesis (Project Work) in the final two semesters enables students to apply concepts and techniques learned during the programme.
- **Academic Flexibility & Support**
 - Accommodate professional or personal commitments with the option for a **course break** while keeping your enrolment active.
 - Provision for **Integrated Ph.D.** for those aiming for advanced research careers.
 - The programme uses a Continuous Evaluation System that assesses the learners over convenient and regular intervals.

Outcomes

- Earn an M.Tech. degree from an **Institute of National Importance**, ensuring global recognition.
- Gain expertise in **cutting-edge technologies**, leading to premium roles in top-tier industries or advanced academic positions.
- Complete a **60-credit curriculum** equivalent to the full-time programme, ensuring academic quality

Why IIIT Kottayam?

- **Academic Excellence**

IIIT Kottayam is recognized as one of the premier IIITs in India, known for its unwavering commitment to promoting a culture of innovation and academic excellence. With a distinguished faculty comprising experts in various fields and a comprehensive, forward-thinking curriculum, the institute ensures that students receive a top-tier education. The institute's emphasis on research, industry collaborations, and hands-on learning equips students with the skills and knowledge required to excel in today's fast-evolving technological landscape.

- **High-Quality Education:**

Our curriculum at IIIT Kottayam is meticulously designed to develop innovative thinkers and future leaders in technology ensuring that students are well-prepared to tackle real-world challenges. By integrating cutting-edge research with practical applications, institute provides a high quality education that equips students with the skills and knowledge necessary to thrive in their chosen fields.

- **Funded Research Projects:**

The institute fosters a strong research culture, securing numerous funded research projects across various cutting-edge fields, significantly contributing to the body of knowledge and technological advancement. Emphasizing translational projects, the institute has made notable strides in converting research into practical applications. Students have an opportunity to become part of funded research projects, collaborating with faculty and industry experts on cutting-edge research. These projects allow students to apply their knowledge practically, developing innovative solutions to current challenges.

- **Research Groups**

The institute has established several specialized research groups that include faculty members, Postdoctoral scholars, Ph.D. scholars, M.Tech students, B.Tech. students, alumni, industry experts, and international collaborators. These groups drive innovation and research, ensuring a vibrant and productive research environment. Notable research groups at IIIT Kottayam include Data Science Research Group, Big data & ML Research Group, Cyber Security Research Group, Network Science Research Group, IoT Cloud Research Group, Intelligent IoT Research Group, Smart Wireless Inter-Networking Research Group, Intelligent Integrated Circuits and Systems Research Group, Computational Engineering and Data Modelling Research Group, Data Analytics and Business Decisions, Bio-Medical Informatics and Genomics Research Group, FACTS-H Lab, AI-powered Signal and Image Processing Research (ASPIRE) Group. These groups are at the forefront of technological research, contributing significantly to the advancement of knowledge and providing students with unparalleled opportunities to engage in high-impact research.

- **Incubation, Start-ups and Industry Interface**

IIIT Kottayam has dedicated incubation centres that support start-ups and entrepreneurial ventures, fostering a dynamic ecosystem for innovation and business development. These centres provide essential resources, mentorship, and funding opportunities to help students and faculty turn their innovative ideas into successful businesses. The institute's strong connections with the industry ensure that students gain practical, real-time experience, effectively bridging the gap between academic learning and industry requirements. IIIT Kottayam has established partnerships with major IT giants, providing students with opportunities to work on industry-relevant projects, internships, and collaborative research. These partnerships with leading companies such as IBM, TCS,

Unisys, HP, Human Resocia in Japan, Palo Alto Networks, Nvidia, Commvault, Cycus and NeST digital to name a few, help prepare students for careers in the ever-evolving tech landscape.

• International Collaborations

IIIT Kottayam maintains collaborations with international universities and research institutions, providing students with invaluable opportunities for global exposure. These partnerships facilitate participation in global conferences, exchange programs, and collaborative research projects, offering students a broader perspective and enhancing their academic and professional development.

• Technical Events and Workshops

IIIT Kottayam regularly hosts technical events and workshops on the latest technologies. Through forums like the IEEE Student Branch and the ACM Chapter, students are introduced to emerging trends and advanced concepts that go beyond the standard curriculum. These events provide students with hands-on experience and insights into cutting-edge advancements in fields such as artificial intelligence, machine learning, blockchain, cyber security, cyber physical systems and more.

Programmes

• Artificial Intelligence, Machine Learning and Data Science

In today's digital era, organizations across the globe increasingly rely on data-driven strategies to drive innovation, efficiency, and sustainable growth. The integration of Artificial Intelligence (AI) into business processes enables enterprises to make intelligent decisions, uncover new opportunities, and gain a competitive advantage in a rapidly evolving technological landscape.

The CSE department at IIIT Kottayam has established itself as a dynamic hub for research, innovation, and academic excellence, particularly in the domains of Artificial Intelligence, Machine Learning, Data Science, and emerging computing technologies. The department demonstrates strong research capabilities through competitive research grants, patents in AI and ML applications, high-impact publications, and sustained collaborations with leading industries as well as national and international research institutions. It actively engages in consultancy and collaborative projects, addressing real-world challenges through interdisciplinary approaches.

Supported by state-of-the-art research facilities and high-performance computing infrastructure, the department enables advanced experimentation and large-scale data-driven research. A vibrant research ecosystem is fostered through regular academic engagements such as weekly research talk series, *Voices in Research* panel discussions, and hands-on initiatives like *INNOVATE*. The department also hosts several specialized research groups and laboratories, including DSRG, Big Data & Machine Learning Research Group, Network Science Research Group, IoT Cloud Research Group, Intelligent IoT Research Group, SWING, Computational Engineering and Data Modelling Group, Data Analytics and Business Decisions Group, BioMIRG, FACTS-H Lab, and the ASPIRE Group, creating an intellectually stimulating environment for innovation and interdisciplinary collaboration.

• Cyber Security and Digital Forensics

Cyber Security and Digital Forensics play a vital role in safeguarding the digital infrastructure of modern society. While cyber security focuses on preventing unauthorized access, attacks, and data breaches across critical systems and networks, digital forensics involves the investigation and analysis of cyber incidents to uncover evidence and understand the nature of the breach. Together, they ensure not only the protection of data and systems but also support legal and regulatory frameworks by enabling traceability and accountability.

Cybersecurity department at IIIT Kottayam has emerged as a key national hub for cyber security training and research. The institute has trained the Indian Cyber Commandos under I4C, Ministry of Home Affairs programme. It has also trained 1000+ police and law enforcement officers and collaborates with agencies on real cyber investigations. The programme is supported by advanced research labs such as ROOT, SHERLOCK, CyberLabs,

FACTS-H, SPHINX, TRUSNET, and DRONE Lab. Delivered by internationally certified faculty (CEH, CHFI), the e-M.Tech equips professionals with strong technical and investigative cyber security expertise.

The **e-M.Tech. in Cyber Security and Digital Forensics** offers a strong blend of theoretical foundations, hands-on technical training, and exposure to real-world cyber scenarios. The programme equips students with the skills to design secure systems, perform digital forensic investigations, and address emerging cyber threats, enabling them to contribute effectively to cyber resilience, digital trust, and justice in an increasingly connected world.

Features of the programme

Duration	Self-paced over Two to Four years																					
Eligibility	The candidate must hold a B.Tech./BE/AMIE degree in any discipline, or an MCA, MSc/MS in CS/IT/Mathematics/Physics/Statistics, or a 4-year undergraduate degree (Hons. or Hons. with Research) in relevant subjects, with at least 60% aggregate in the qualifying examination.																					
Selection Procedure	1. Candidates must fill out an online application. 2. Shortlisted candidates will have to undergo a selection process. 3. The final selection of the candidate will be based on the performance in the selection process, and any other criteria deemed suitable by the admission committee. 4. The department reserves the right to set any cut-off criteria for shortlisting the candidates.																					
Documents required while submitting the online application	Scanned copy of Qualifying degree, Mark lists, and Certificates from Class X onwards.																					
Application Fee	• The fee for online application is ₹500/- (Except for women/SC/ST Candidates). • All Women candidates and Scheduled Castes (SC)/Scheduled Tribes (ST) candidates are required to pay ₹250/- towards the Application Fee.																					
Fee structure	1. For the successful completion of the programme, the students have to complete 32 Course credits and 28 Project credits. 2. The course fee is ₹5,000 per credit for the theory/lab courses and for the project work. 3. The following are typical tuition fee figures to be paid by the students per semester for (1) Artificial Intelligence, Machine Learning and Data Science and (2) Cyber Security and Digital Forensics. <table><thead><tr><th>Semester</th><th>Credits</th><th>Fees</th></tr></thead><tbody><tr><td>I</td><td>14</td><td>70,000</td></tr><tr><td>II</td><td>12</td><td>60,000</td></tr><tr><td>III</td><td>20</td><td>1,00,000</td></tr><tr><td>IV</td><td>14</td><td>70,000</td></tr><tr><td>Alumni (One –time fee)</td><td>-</td><td>2,000</td></tr><tr><td>Total</td><td>60</td><td>3,02,000</td></tr></tbody></table> • Once selected, and for any reason the student is not willing to register or wishes to take a break for a particular semester, the student can request for a semester break	Semester	Credits	Fees	I	14	70,000	II	12	60,000	III	20	1,00,000	IV	14	70,000	Alumni (One –time fee)	-	2,000	Total	60	3,02,000
Semester	Credits	Fees																				
I	14	70,000																				
II	12	60,000																				
III	20	1,00,000																				
IV	14	70,000																				
Alumni (One –time fee)	-	2,000																				
Total	60	3,02,000																				

by applying to the institute followed by a payment of Rs. 10,000/- to ensure the continuation in the programme.

- The fee paid will be forfeited if the student withdraws after admission and the commencement of classes.

Important Dates

Registration opens	Active
Release of online application form	16 th March 2026 Onwards
Last date for submitting online applications	16 th 30 th April 2026
List of shortlisted candidates for assessment process	7 th May 2026
Assessment	15 & 16 May 2026
Release of provisional list of selected candidates	20 th May 2026
Last date for fee payment	15 th June 2026
Offline document verification (Slot 1)	26 th & 27 th June 2026
Offline document verification (Slot 2)	10 th & 11 th July 2026
Orientation & Commencement of classes	07 th August 2026

Course Mode

- The classes, virtual lab sessions, and mid-semester exam shall be conducted in online mode.
- End Semester Exam, as well as Final Project Review, shall be conducted in Offline mode. The offline exam centres will be the Off-Campus centre in Trivandrum, Main campus in Kottayam, Other centres such as Cochin, or Bangalore, subject to the availability of sufficient candidates and administrative feasibility.
- Live recording, submission, and internal assessment will be under the in-house developed platform.

Detailed Course Structure

e-M.Tech. in Artificial Intelligence, Machine Learning and Data Science

Course Code	Course	L-T-P	Credits
Semester I			
DSC511	Statistical Foundations for Data Science	2-0-0	2
DSC512	Programming and Data Structures	2-0-2	3
DSC513	Introduction to Data Science	2-0-2	3
DSC522	Artificial Intelligence Engineering	2-0-2	3
DSC523	Data Mining	3-0-0	3
			14
Semester II			
DSC521	Mathematical Foundations for Data Science	2-0-0	2
DSC611	Machine Learning: Principles and Practices	3-0-0	3
DSCXXX	Designing MLoPs for Enterprises	3-0-0	3
DSCXXX	AI and ML for Big Data	1-0-0	1
DSC613	Big Data Analytics	2-0-2	3
			12
Semester III			
DSC612	Neural Networks and Deep Learning	3-0-0	3
DSC624	Natural Language Processing and Large Language Models	2-0-2	3
CSE711	Project (Phase I)		14
			20
Semester IV			
CSE721	Project (Phase II)		14
Total Credits			60

e-M.Tech. in Cyber Security and Digital Forensics

Course Code	Course	L-T-P	Credits
Semester I			
CBM511	Mathematical Foundations for Cyber Security	2-0-0	2
DSC512	Programming and Data Structures	2-0-2	3
CBM513	Computer Networks and Security	2-0-2	3
CBM524	AI, Machine Learning and Security	2-0-2	3
CBM613	Operating System Security	3-0-0	3
			14
Semester II			
CBM521	Secure Software Engineering	3-0-0	3
CBM522	Information Security and Applied Cryptography	2-0-2	3
CBM616	Network, Wireless & IoT Security	2-0-2	3
CBMXXX	Digital Forensics	2-0-2	3
			12
Semester III			
CBMXXX	Malware and Penetration Testing	2-0-2	3
CBM615	Blockchain Architecture and Applications	2-0-0	2
CBMXXX	Legal and Ethical Issues in Computing	1-0-0	1
CBE711	Project (Phase I)		14
			20
Semester IV			
CBE721	Project (Phase II)		14
Total Credits			60

Frequently Asked Questions

1. Who conducts the classes?

All classes are conducted by the IIIT Kottayam faculty. Industry experts are also invited for sharing their valuable experiences.

2. What is the Teaching Methodology?

The pedagogy is highly interactive and incorporates expansive teaching methods and approaches.

3. What PG Degree do we get?

On successful completion of the course, the candidates will be awarded M.Tech. in Artificial Intelligence, Machine Learning and Data Science / M.Tech. in Cyber Security and Digital Forensics.

4. Can I visit the campus and have face-to-face interaction with the faculty members?

Participants are welcome to visit the campus and meet the faculty members, with prior appointments.

5. What is the duration of the course?

Four semesters, which should be completed within a duration of a minimum of two years and a maximum of four years from the date of admission.

6. What do the minimum and maximum durations refer to?

Minimum duration is the minimum period required to get your degree. Maximum duration indicates that you have to finish your degree within that period failing which your academic programme will be terminated unless Senate approves any extension.

7. What is the credit structure of the e-M.Tech. programme, and how much flexibility do I have to complete it?

In the first year, students are expected to complete 23 credits of coursework. The second year is dedicated to a project carried out in two phases, with each phase carrying 14 credits. The programme allows students the flexibility to spread out their coursework across multiple semesters within the 2 - 4 years period, depending on their pace. However, the project component can be undertaken only after the completion of the required coursework.

8. As a student enrolled for e-M.Tech., can I get any form of assistantship?

While the institute does not currently offer assistantships for e-M.Tech. students, you are welcome to explore financial support through external institutions.

Details: <https://www.iiitkottayam.ac.in/#!/scholarship>

9. What is the fee structure?

The course fee is ₹5,000 per credit (project work as well as coursework) along with a one-time Alumni fee of ₹2000. The students are required to earn a minimum of 60 credits for the award of the M.Tech. Degree. Thus, the course fees come to a total of **3, 02,000/-**

10. What is the eligibility for applying to MTech in (1) Artificial Intelligence, Machine Learning and Data Science, (2) Cyber Security and Digital Forensics?

The candidate must hold a B.Tech./BE/AMIE degree in any discipline, or an MCA, MSc/MS in CS/IT/Mathematics/Physics/Statistics, or a 4-year undergraduate degree (Hons. or Hons. with Research) in relevant subjects, with at least 60% aggregate in the qualifying examination ([as per R 11.5 of Public-Notice-UG-and-PG-Regulations-2025, UGC, NCRF](#)).

11. Is the e-M.Tech. degree officially recognized and valid for academic or professional purposes?

Yes, the e-M.Tech. degree awarded by IIIT Kottayam is officially recognized, as the institute is an Institute of National Importance under the Ministry of Education, Government of India. The degree is valid for all academic and professional purposes.

Details: [IIITK Statutes](#)

12. Is the e-M.Tech. degree equivalent to a regular M.Tech. degree?

Yes, the e-M.Tech. programme follows the same credit structure and academic rigor as the regular M.Tech., and the degree awarded holds the same academic and professional value.

- [Equivalence of degree through ODL and Online Mode - UGC Public Notice \(2022\)](#)
- [Guidelines regarding Equivalency/Recognition - Kerala State Higher Education Council \(2018\)](#)

13. I still have questions regarding admissions/PG degree programmes at IIIT Kottayam, whom shall I contact?
